Current As of 31 May 1973

TM 5-2410-209-34P, 21 April 1972, is changed as follows:

General. All changes, additions, or deletions of Federal Stock Numbers (FSN's) or Manufacturer's Part Numbers (P/N's) within this change must be appropriately reflected in the index.

Page v. In Section III, delete the words "NOT APPLICABLE."

Page x. Paragraph 7 is superseded as follows:

7. Recommendations for Maintenance Publication Improvements

You can improve this manual by calling attention to errors and by recommending improvements, using DA Form 2028 (Recommended Changes to Publications) or by a letter and mail directly to Commander, U.S. Army Troop Support Command, ATTN: AMSTS-MP, 4300 Goodfellow Boulevard, St. Louis, MO. 63120. A reply will be furnished directly to you.

Page 48. In Group 15, line item 5, change column (1) to "PO"; to column (2), add: "5340-282-7519"; in column (6) (a), (b), and (c), add: "4", "7" and "15", respectively; in column 7 (a), (b), and (c), add: "4", "7", and "15", respectively.

Page 75. In line item 7, change part number in column 3 to "0650578-8".

Page 86, Group 26. In line item 3, add to column (2):

"2940-740-6099". In column (3), change part number to read: "4388-648-0". After line item 3, add line item 3A as follows: in column (1), add: "X20"; in column (3), add: "NIPPLE, PIPE 0901467-1"; in column (4), add: "EA"; in column (5), add: "1". After line item 3A, add line item 3B as follows: in column (1), add: "X20"; in column (3), add: "FLANGE 3045531-5"; in column (4), add: "EA", in column (5), add: "1".

Page 180. In Group 53, after line item 6, add line item 7 as follows: In column 3, add: "CONVERSION KIT 4391360 (09367)". All other columns remain blank.

Page 198. In line item 6, column 1, change SMR code to: "PD"; in line item 7, column 1, change SMR code to: "PD"; in line item 9, column 1, change SMR code to: "PD"; in line item 10, column 1, change SMR code to: "PD"; in line item 11, column 3, change SMR code to: "PD"; in line item 12, column 1, change SMR code to: "PD"; in line item 13, column 1, change SMR code to: "PD"; change FSN in column 2 to read: "5330-893-7533".

Page 212. In line item 21, column 3, change P/N to read: "0642960". In line item 22, column 3, change P/N to read: "J1101-2"; change Manufacturer's Code to read: "76005".

Section III. SPECIAL TOOLS, TEST AND SUPPORT EQUIPMENT
FOR DS, GS, AND DEPOT MAINTENANCE NOT
APPLICABLE

IV. FEDERAL STOCK NUMBER AND REFERENCE
NUMBER INDEX 383

SECTION I INTRODUCTION

1. Scope

a. This manual lists repair parts, special tools, test and support equipment required for the performance of direct support, general support, and depot maintenance of the Tractor.

b. Repair parts listed represent those authorized for use at indicated maintenance levels and will be requisitioned on an "as required" basis until stockage is justified by demand in accordance with AR 735-35 or AR 710-2.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. *Repair Parts - Section II.* A list, in figure and item number sequence, of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level, including those items which must be removed for replacement of the authorized item. Items, except kits and sets, are listed by assembly groups in top down sequence. Repair parts kits and sets are listed at the end of the Repair Parts Listing or group to which they apply. Components of the kits and sets are listed in their proper sequence in the assembly or group to which they belong and are referenced to the FSN of the kit or set.

b. *Special Tools, Test and Support Equipment - Section III.* A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support, and depot level.

c. *Federal Stock Number and Reference Number Index - Section IV.* A list of Federal stock numbers in ascending numerical sequence followed by a list of reference numbers in ascending alphanumeric sequence, cross-referenced to the illustration figure number and item number.

3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in sections II and III:

a. Source, Maintenance, and Recoverability Code (SMR).

(1) Source code indicates the source for the listed item. Source codes are:

Code	Explanation
P	Repair Parts, Special Tools and Test Equipment supplied from the GSA/DSA, or Army supply system, and authorized for use at indicated maintenance levels.
P2	Repair Parts, Special Tools and Test Equipment which are procured and stocked for insurance purposes because the combat or military essentiality of the end item dictates that a minimum quantity be available in the supply system.
M	Repair Parts, Special Tools and Test Equipment which are not procured or stocked, as such, in the supply system but are to be manufactured at indicated maintenance levels.
A	Assemblies which are not procured or stocked as such; but are made up of two or more units. Such component units carry individual stock numbers and descriptions, are procured and stocked separately and can be assembled to form the required assembly at indicated maintenance levels.
X	Parts and assemblies that are not procured or stocked because the failure rate is normally below that of the applicable end item or component. The failure of such part or assembly should result in retirement of the end item from the supply system.
X1	Repair Parts which are not procured or stocked. The requirement for such items will be filled by the next higher assembly or component.
X2	Repair Parts, Special Tools and Test Equipment which are not stocked and have no foreseen mortality. The indicated maintenance level requiring such repair parts will attempt to obtain the parts through cannibalization or salvage, if not obtainable through cannibalization or salvage, the item may be requisitioned with exception data, from the end item manager, for immediate use.
G	Major assemblies that are procured with PEMA funds for initial issue only as exchange assemblies at DSU and GSU level. These assemblies will not be stocked above the DS and GS level or returned to depot supply level.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded X1 and aircraft support items as restricted by AR 700-42.

(2) Maintenance code indicates the lowest level of maintenance authorized to install the listed item. Repair parts and special tools assigned maintenance code

"C" may be stocked at the operator level of maintenance when authorized by the unit commander. The maintenance level codes are

Code	Explanation
C	Operator/Crew maintenance
O	Organizational maintenance
F	Direct Support maintenance
H	General Support maintenance
D	Depot maintenance

(3) Recoverability code indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are

Code	Explanation
R	Applied to repair parts, (assemblies and components), special tools and test equipment which are considered economically repairable at direct and general support maintenance levels. When the item is no longer economically repairable, it is normally disposed of at the GS level. When supply considerations dictate, some of these repair parts may be listed for automatic return to supply for depot level repair as set forth in AR 710-50. When so listed, they will be replaced by supply on an exchange basis.
S	Repair Parts, Special Tools, Test Equipment and assemblies which are economically repairable at DSU and GSU activities and which normally are furnished by supply on an exchange basis. When items are determined by a GSU to be uneconomically repairable, they will be evacuated to a depot for evaluation and analysis before final disposition.
T	Higher dollar value recoverable repair parts, special tools and test equipment which are subject to special handling and are issued on an exchange basis. Such items will be evacuated to the depot for overhaul or final disposition. Communications-Electronics and missile support items will be repaired/overhauled only at depots.
U	Repair Parts, Special Tools and Test Equipment specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value or reusable casings or castings.

b Federal Stock Number This column indicates the Federal stock number assigned to the item and will be used for requisitioning purposes.

c Description This column indicates the Federal item name and a minimum characteristic description required to describe the item. Assembly components and subassemblies are indented under major assemblies. The abbreviation "w/e" when used as a part of the nomenclature indicates

the Federal stock number includes all armament, equipment, accessories, and repair parts issued with the item. A part number or other reference number is followed by the applicable five-digit Federal supply code for manufacturers in parenthesis. Repair part quantities included in kits and sets as shown in front of the repair part name. Material required for manufacture or fabrication is identified.

d Unit of Measure (U/M) A two-character alphabetic abbreviation indicating the amount or quantity of the item, as used, upon which the allowances are based, e.g., ft, ea, pr, etc.

e Quantity Incorporated in Unit This column indicates the quantity of the item used in the assembly group. A "V" appearing in this column in lieu of a quantity indicates that a definite quantity cannot be indicated (e.g., shims, spacers, etc.).

f Thirty-Day DS/GS Maintenance Allowance

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The allowance columns are divided into three subcolumns. The quantitative allowance of special tools for DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

g Items Authorized

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools required for distribution and contingency planning purposes.

h Depot Maintenance Allowance Per 100 Equipments

(1) Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) This column indicates the total quantity of special tools authorized for depot maintenance of 100 equipments.

i Illustration This column is divided as follows:

(1) *Figure number* Indicates the figure number of the illustration on which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

4. Special Information

a. Identifications of the useable on codes included in the description column of this publication are: (Applicable only when identifying parts to a particular serial number range or model.)

Code	Used on
A	Engine model 16,000
B	Engine model 17,000

b. Parts which require manufacture or assembly at a level higher than that authorized for installation will indicate in the source column the higher level.

c. The following publications pertain to the tractor and its components:

TM 5-2410-209-35	DS, GS, and Depot Maintenance Manual
LO 5-2410-209-12	Lubrication Order

5. How to Locate Repair Parts

a. When Federal Stock Number, Reference Number or Part Number is unknown:

(1) Using the table of contents, determine the assembly group within which the repair part belongs. This is necessary since illustrations are prepared for assembly groups, and listings are divided into the same groups.

(2) Find the illustration covering the assembly group to which the repair part belongs.

(3) Identify the repair part on the illustration and note the illustration figure number and item number of the repair part.

(4) Using the Repair Parts Listing, find the assembly group to which the repair part belongs and locate the illustration figure and item number noted on the illustration.

b. When the Federal Stock Number, Reference Number, or Part Number is known:

(1) Using the index of Federal stock numbers, reference numbers, and/or part numbers find the pertinent Federal stock

number, reference number, and/or part number. This index is in ascending FSN sequence followed by a list of reference numbers or part numbers in ascending alpha-numeric sequence, cross-referenced to the illustration figure number and item number.

(2) Using the repair parts listing, find the assembly group of the repair part and the illustration figure number and item number referenced in the index of Federal stock numbers, reference numbers, or part numbers.

c. When the Federal Stock Number, Reference Number, or Part Number is known and the Repair Part is not Illustrated:

(1) Using the index of Federal stock numbers, reference numbers, or part numbers find the pertinent Federal stock number, reference number, or part number. Parts which are not illustrated will reference to a figure number but will not show an item number. This section is in ascending FSN sequence followed by a list of reference numbers or part numbers in alpha-numeric sequence, cross-referenced to the figures.

(2) Using the table of contents, locate the figure number and page number.

(3) Using the applicable figure and page number, locate the pertinent FSN, reference number, or part number in the Repair Parts Listing.

6. Abbreviations

AWG	American Wire Gage
cl	coils(s)
csk	countersunk
deg	degree(s)
dia	diameter
ea	each
ft	foot (feet)
gal	gallon(s)
hd	head (ed)
id	inside diameter
in	inch (es)
lg	long (length)
lh	left hand
mtg	mounting
No	number
o/a	overall
od	outside diameter
rh	right hand
thd	thread (ed)
thk	thick (ness)
v	volt (s)
w	watt (s)
w/	with
yd	yard (s)

TM 5-2410-209-34P

**7. Recommendations for Maintenance
Publication Improvements**

Reports of errors, omissions, and recommendations for improving this publication by the individual user is encouraged Re-

ports should be submitted on DA Form 2028 (Recommended Changes to Publications), and forwarded direct to Commanding General, U S Army Mobility Equipment Command, ATTN: AMSME-MPP, 4300 Goodfellow Boulevard, St Louis, Mo 63120
